

G Suite Quick Fixes Help

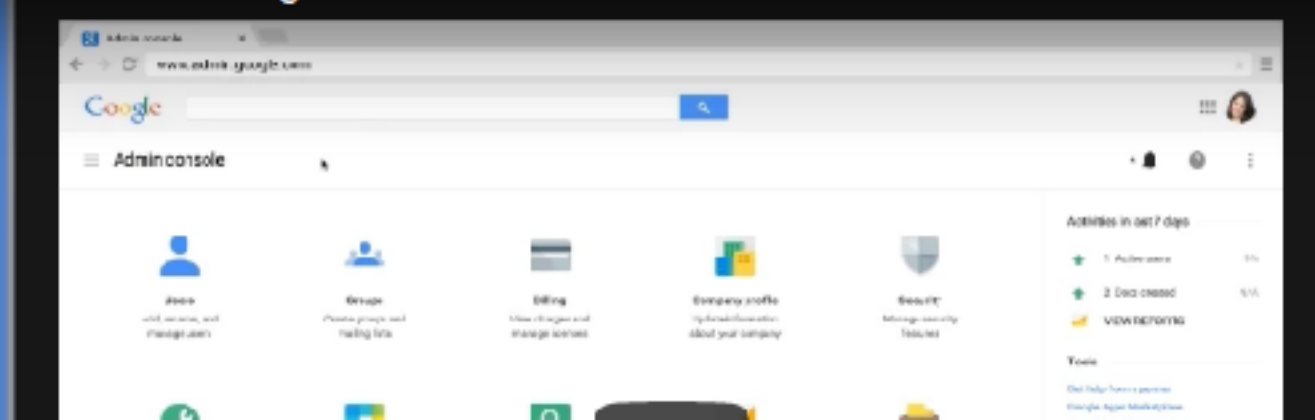

You're seeing [customized help](#) based on your account: [liz@queenbooks.ca](#)

Where do I set everything up for my G Suite domain?

You can manage all of your G Suite administrator settings in the **Admin console**

1. In any web browser, go to admin.google.com. [You, liz@queenbooks.ca, are a domain admin.](#) You can access the Admin console.
2. On the sign-in page, enter your full Google *administrator* address and click **NEXT**.
3. Enter your password, and click **Sign-In**. [Forgot your password?](#)
4. Welcome to the Admin console! You can watch the video below to learn how to use it.

Introduction to redesigned Admin Console

Thanks for choosing G Suite

^ Basic settings

Password management

Password strength

Minimum length

0

Maximum length

100

Password length restrictions must be between 8 and 100 characters.

Password recovery

[Enable/disable non-admin user password recovery »](#)

Two-step verification

2-Step Verification adds an extra layer of security to your G Suite accounts. Users are required to enter a verification code sent by Google (in addition to their username and password) when they sign in.

 Allow users to turn on 2-step verification[Go to advanced settings to enforce 2-step verification »](#)

Less secure apps

Some apps use less secure sign-in technology, which makes accounts more vulnerable. You can choose to deny access for these apps, which we recommend, or choose to allow access despite the risks.
